

MODULAR EXHIBITION STANDS

With our trade fair modules, counter solutions, mobile or stationary presentation systems and flexible accessories, you can create unique appearances that leave a lasting impression – resource-friendly, modular, and adaptable at any time. All systems can be assembled and dismantled quickly and can be reused again and again. While trade fairs usually generate tons of waste, we rely on durable materials and smart systems that make set-up and dismantling easy while avoiding unnecessary waste.

Whether it's a rolling exhibition module in timeless wood design or in different colours, a flexible trade fair counter, or pallet-rack solutions – with add-ons like banners, signs, or individual lighting installations, you can stage your personal branding perfectly at every event. Generous storage space, robust materials such as three-layer spruce panels or galvanized aluminium, as well as thoughtful details like plug & play lighting, make your appearance both functional and sustainable.

STAND OUT SUSTAINABLY – MODULAR EXHIBITION STANDS BY WERKHAUS

PLAN FLEXIBLY, CONNECT STABLY

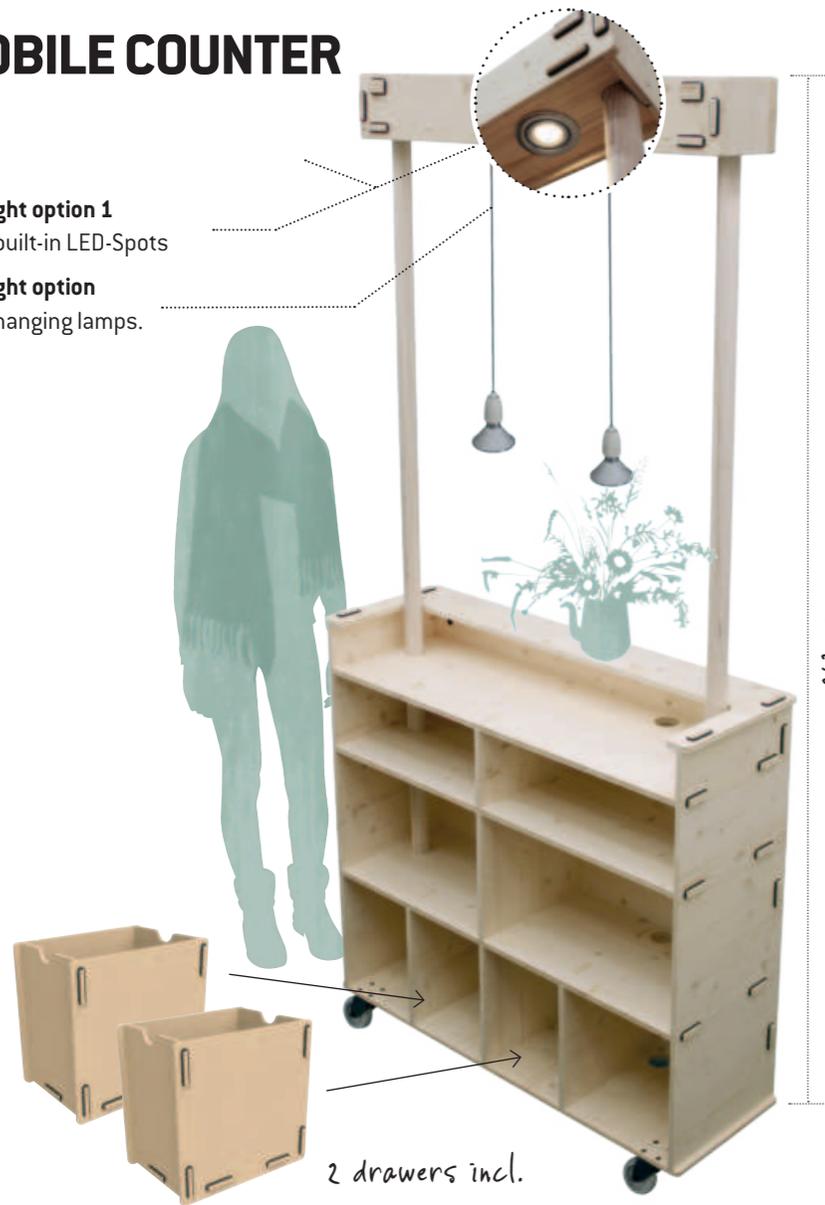

With ash roundwood poles and robust tube connectors, exhibition stands can be planned flexibly and extended individually – from open presentation areas to closed booth solutions. The galvanized connectors made of malleable cast iron securely and permanently fix the poles with stainless steel clamping cutting screws – ensuring maximum stability and a professional appearance. Graphics and logos appear perfectly on the 4c textile banners made of high-quality decorative fabric (210 g/m²). Precisely tailored for the rollable exhibition stand, the banners can be easily exchanged and reused – allowing flexible branding at every event.

PALLETS RE-INTERPRETED

We are giving pallet racks a new stage: made of galvanized steel and robust three-layer spruce panels, they become stable, modular exhibition stands that are as durable as they are flexible. With a height of 3.5 m and widths of 180 or 270 cm, the system provides maximum visibility and can be adapted and recombined from trade fair to trade fair.

The basic structure – a prefabricated heavy-duty rack – is complemented by our precisely fitting trade fair add-ons: signs, lighting, tables, shelves, drawers, or banners turn it into a unique presentation stand with character. Quick to set up and dismantle, reusable time and again, and still usable as a heavy-duty rack after the fair – this makes your presentation truly sustainable.

BRAND PRESENTATION ON THREE WHEELS

In cooperation with CARLA CARGO, we have developed a sustainable transport trailer that makes brand messages visible and can be used flexibly. The robust wooden containers with direct print attract all eyes and can be converted with just a few simple steps – from bicycle trailer to mobile pop-up store, to festival bar, or to practical handcart. Practical compartments, rollable units and an expandable lightweight roof system ensure maximum flexibility. This way, emission-free mobility becomes a real eye-catcher.

ABOUT WERKHAUS

For more than 30 years, we have stood for sustainable design made in Germany. Our ecological commitment is reflected in the use local, regionally sourced thinning wood and non-toxic colors. With our award-winning connecting system, we demonstrate innovative strength: simply connect the parts, secure them with rubber rings – done.

Social responsibility is equally important to us. We have around 120 employees at our production site in the Lüneburg Heath, including ten percent people with disabilities and currently eleven trainees. Diversity and open-mindedness go without saying for us – about 30 percent export share and employees from ten nations are proof of that.

All prices are net prices (excluding VAT), ex works Bad Bodenteich. The delivery time is approx. 6-8 weeks.
